Professional Summary

Analytical problem-solver with 2+ years of experience bridging business needs and technical solutions in consulting environments. Skilled at listening to team workflows, identifying pain points, and translating complex requirements into lightweight internal tools and automations using Python, JavaScript, and low-code platforms (N8N). Combines a Master's in Business Economics with strong prompt engineering and AI-assisted coding practices (Claude CLI, Copilot) to rapidly deliver practical solutions that improve team efficiency.

Work Experience

AI Automation Project – Personal Project 05/2025 – Present | Brussels, Belgium

- Architected and deployed AI-powered automation solutions using low-code platforms
- Containerized applications with Docker to ensure consistent deployment across environments
- Designed scalable workflow automation systems leveraging generative AI capabilities

Machine Learning Content Contributor @Outlier – Scale AI 10/2025 – 07/2025 | Brussels, Belgium

- Provided specialized subject matter expertise to develop advanced generative AI systems
- Delivered high-quality evaluations and feedback to improve AI model performance
- Collaborated with expert community to enhance AI understanding of complex topics
- Gained hands-on experience with cutting-edge language models through exclusive testing platforms
- Contributed directly to the development of next-generation artificial intelligence technology

Junior Technology Consultant – European security concept 2022 – 2023 | Brussels, Belgium

- Managed project management
- Configured ERP system
- Implemented software and hardware
- Trained users and documented
- Implemented an ERP-CRM system
- Provided user training

Analyst in Non-Life insurance (Internship) – Axa Belgium 2021 – 2022 | Brussels, Belgium

- Analyzed risk modeling in Household and car insurance
- Applied machine learning (GBM, RF, GLM, NN)
- Reporting and presentation
- Employed machine learning tools such as GBM and GLM
- Demonstrated expertise in data visualization and presentation
- Focused on analyzing optional warranties within Household and Auto (Non-Life) insurance

Student Teaching Assistant in computer science – Université libre de Bruxelles 01/2020 – 06/2019 | Brussels, Belgium

- In this role, I provided support and guidance to students in their foundational understanding of Python and computer science concepts.

Education

LearnWeb3 – Brussels, Belgium 01/2024 - 09/2024
